PERSONAL STATEMENT

Frontend Developer with hands-on experience building and shipping complete web applications. I have delivered real projects across training, internship, and freelance environments, including an e-commerce app with live Paystack payments, multiple client websites, and FlashPromote, an influencer marketing SaaS built with React, TypeScript, Supabase, Stripe, and Resend. I graduated as a Frontend Engineer from AltSchool Africa and am currently completing an MSc in Computing at the University of Sunderland. Available for frontend and remote roles.

TECHNICAL SKILLS

Frontend	React.js, Next.js, TypeScript, JavaScript (ES6+), Vue.js, Nuxt.js, HTML5, CSS3
Mobile	React Native, Expo, Expo Router
Styling & UI	Tailwind CSS, CSS Modules, SASS/SCSS, Bootstrap, Responsive Design, Figma
Backend & DB	Supabase (PostgreSQL, Auth, Storage, Edge Functions), Node.js, REST APIs
Payments & Email	Stripe, Paystack, Resend
3D & Graphics	Three.js, React Three Fiber
State & Data	Zustand, React Query, React Hook Form, Axios, Fetch API
Tools	Git, GitHub, Vite, Vercel, Postman, Chrome DevTools, VS Code

WORK EXPERIENCE

Frontend Developer Internship · Trueminds Innovations Ltd

February 2026 to April 2026

- Worked on 5+ client websites using React.js, HTML5, CSS3, and JavaScript, handling everything from layout to deployment.
- Translated Figma designs into production-ready components, flagging design issues early in the handoff process.
- Participated in code reviews and sprint workflows, debugging UI issues alongside senior developers.
- Used Git daily across feature branches, commits, and pull requests on live client projects.

Frontend Engineer · JhayFx Trading Academy

2024 to 2025

- Built and maintained the company's web presence using HTML5, CSS3, and JavaScript across desktop and mobile.
- Used Vue.js to build interactive UI features for the academy's course content, used by students daily.
- Integrated social media and third-party APIs to add live functionality to the platform.
- Reduced page load time by refactoring JavaScript and compressing assets, improving performance on slower connections.

KEY PROJECTS

FlashPromote (React · TypeScript · Supabase · PostgreSQL · Stripe · Resend · Vite)

- Influencer marketing SaaS connecting brands with creators, built in React/Next.js and integrating Stripe, Resend, and Supabase for payments, email, and data.
- Implemented dual-role dashboards for brands (campaign creation, creator marketplace) and influencers (applications, pricing plans, workspaces).
- Integrated Stripe for payment flows and Resend for transactional email, with Supabase handling auth, storage, and the real-time database.

OrbitTrack (Next.js · TypeScript · Three.js · React Three Fiber · Tailwind CSS)

- Live satellite tracker built with Next.js App Router, rendering real-time orbital positions for the ISS and other satellites on an interactive 3D globe with Three.js and React Three Fiber.
- Built a server-side API proxy layer to keep third-party keys secure, with polling-based live updates and visible-pass predictions using browser geolocation.
- Implemented dynamically generated Open Graph share images per satellite using Next.js's image generation API, producing real social preview cards.

OrbitTrack Mobile (React Native · Expo · Expo Router · TypeScript)

- React Native companion to OrbitTrack, built with Expo Router and reusing the existing web app's live API as its backend with zero new server infrastructure.
- Live satellite tracking on a native map (react-native-maps) with location-based visible-pass predictions via device GPS (expo-location).
- Local, client-scheduled push notifications (expo-notifications) ahead of a satellite's visible pass, with AsyncStorage-based deduplication so re-fetching predictions never double-schedules.

EDUCATION

MSc Computing — University of Sunderland, UK

In Progress · Expected 2027

Certificate in Frontend Engineering — AltSchool Africa, School of Engineering

Completed · March 2026

BSc Industrial Chemistry — Oduduwa University, Nigeria

2018 to 2023

ADDITIONAL INFORMATION

Languages English (Fluent)

Availability Full-time, Part-time, Contract, Remote

Interests Open-source contribution, building side projects, frontend architecture
