PERSONAL STATEMENT

Full Stack Developer with hands-on experience building and shipping complete web applications from the UI down to the database. I have delivered real projects across training, internship, and freelance environments, including an e-commerce app with live Paystack payments, multiple client websites, and FlashPromote, a full stack influencer marketing SaaS built with React, TypeScript, Supabase, Stripe, and Resend. I graduated as a Frontend Engineer from AltSchool Africa and am currently completing an MSc in Computing at the University of Sunderland. Available for full stack, frontend, and remote roles.

TECHNICAL SKILLS

Frontend	React.js, Next.js, TypeScript, JavaScript (ES6+), Vue.js, Nuxt.js, HTML5, CSS3
Styling & UI	Tailwind CSS, CSS Modules, SASS/SCSS, Bootstrap, Responsive Design, Figma
Backend & DB	Supabase (PostgreSQL, Auth, Storage, Edge Functions), Node.js, REST APIs
Payments & Email	Stripe, Paystack, Resend
State & Data	Zustand, React Query, React Hook Form, Axios, Fetch API
Tools	Git, GitHub, Vite, Vercel, Postman, Chrome DevTools, VS Code

WORK EXPERIENCE

Frontend Engineer • [AltSchool Africa](#) March 2025 to March 2026

- Built and shipped 10+ assessed projects in React.js and TypeScript, covering component architecture, API integration, and state management.
- Used Tailwind CSS and CSS Modules to build responsive layouts consistent across all screen sizes and devices.
- Wrote typed React components with TypeScript, reducing runtime errors and improving long-term maintainability.
- Used Git and GitHub throughout, including branching, pull requests, and peer code reviews as part of a structured team workflow.

Frontend Developer Internship • [Trueminds Innovations Ltd](#) February 2026 to April 2026

- Worked on 5+ client websites using React.js, HTML5, CSS3, and JavaScript, handling everything from layout to deployment.
- Translated Figma designs into production-ready components, flagging design issues early in the handoff process.
- Participated in code reviews and sprint workflows, debugging UI issues alongside senior developers.
- Used Git daily across feature branches, commits, and pull requests on live client projects.

Frontend Engineer • [JhayFx Trading Academy](#) 2024 to 2025

- Built and maintained the company's web presence using HTML5, CSS3, and JavaScript across desktop and mobile.
- Used Vue.js to build interactive UI features for the academy's course content, used by students daily.
- Integrated social media and third-party APIs to add live functionality to the platform.
- Reduced page load time by refactoring JavaScript and compressing assets, improving performance on slower connections.

KEY PROJECTS

FlashPromote React · TypeScript · Supabase · PostgreSQL · Stripe · Resend · Vite

- Full stack influencer marketing SaaS connecting brands with creators, built end to end from authentication to payment processing.
- Implemented dual-role dashboards for brands (campaign creation, creator marketplace) and influencers (applications, pricing plans, workspaces).
- Integrated Stripe for payment flows and Resend for transactional email, with Supabase handling auth, storage, and the real-time database.

E-Commerce App React.js · TypeScript · Tailwind CSS · Zustand · Vite

- Full e-commerce application with cart, checkout, and live Paystack payment integration handling real transactions.
- Used Zustand for cart state, React Query for product data, and Zod with React Hook Form for API-ready form validation.
- Wrote unit tests with Vitest, used Shadcn/UI components, and deployed to Vercel.

CinaVault React.js · React Router DOM · Vite

- Movie discovery app pulling live Hollywood data from a third-party API, allowing users to browse current and upcoming releases.
- Built client-side routing with React Router for a fast, SPA-style experience without full page reloads.
- Handled loading states and API error responses to ensure the UI remains stable when data is delayed or unavailable.

EDUCATION

MSc Computing In Progress · Expected 2027

University of Sunderland, UK

Certificate in Frontend Engineering Completed · March 2026

AltSchool Africa, School of Engineering

BSc Industrial Chemistry 2018 to 2023

Oduduwa University, Nigeria
